

Petroleum Product Price Formation

An analysis of the factors that influence product prices, with chart data updated monthly, quarterly and annually

February 7, 2017 / Washington, DC

Gasoline spot prices

Gasoline spot prices

dollars per gallon, nominal

Note: CBOB is Conventional Blendstock for Oxygenate Blending. CARBOB is California Reformulated Gasoline Blendstock for Oxygenate Blending.

Note: CBOB is conventional blendstock for oxygenate blending. CARBOB is California reformulated gasoline blendstock for oxygenate blending.

Distillate spot prices

Sources: U.S. Energy Information Administration, Bloomberg L.P.

RBOB futures price and crack spread

Note: RBOB is reformulated blendstock for oxygenate blending.

Sources: U.S. Energy Information Administration, Bloomberg L.P.

ULSD futures price and crack spread

Note: ULSD is ultra-low sulfur diesel.

Sources: U.S. Energy Information Administration, Bloomberg L.P.

RBOB – Brent Crack Spread Range

Note: RBOB is reformulated blendstock for oxygenate blending.

Sources: U.S. Energy Information Administration, Bloomberg L.P.

Distillate – Brent Crack Spread Ranges

Note: Since the spring of 2013, the underlying commodity for the distillate futures contract has been ultra-low sulfur diesel (ULSD).

Sources: U.S. Energy Information Administration, Bloomberg L.P.

Petroleum Product Consumption

percent change (year over year)

Sources: U.S. Energy Information Administration

U.S. consumption of gasoline and retail gasoline prices

Sources: U.S. Energy Information Administration

U.S. consumption of distillate and retail heating oil prices

Sources: U.S. Energy Information Administration

Gasoline refinery output

million barrels per day

Sources: U.S. Energy Information Administration

Distillate refinery output

million barrels per day

Sources: U.S. Energy Information Administration

Refinery output

Gasoline Inventories and RBOB 3rd minus 1st month futures contract

Note: Since 2006, the underlying commodity for the gasoline futures contract has been reformulated blendstock for oxygenate blending (RBOB).

Sources: U.S. Energy Information Administration, Bloomberg L.P.

Distillate Inventories and ULSD 3rd minus 1st month futures contract

■ U.S. distillate inventories — Distillate 3rd - 1st month

Note: Since 2013, the underlying commodity for the distillate futures contract has been ultra-low sulfur diesel (ULSD).

Sources: U.S. Energy Information Administration, Bloomberg L.P.

Average daily open interest of petroleum product futures contracts

Note: Gasoline data prior to 2006 used the unleaded gasoline contract. After 2006 the contract changed to reformulated blendstock for oxygenate blending (RBOB). Since the spring of 2013, the underlying commodity for the distillate futures contract has been ultra-low sulfur diesel (ULSD).

Sources: Bloomberg L.P.

Average daily volume of petroleum product futures contracts

Note: Gasoline data prior to 2006 used the unleaded gasoline contract. After 2006 the contract changed to reformulated blendstock for oxygenate blending (RBOB). Since the spring of 2013, the underlying commodity for the distillate futures contract has been ultra-low sulfur diesel (ULSD).

Sources: Bloomberg L.P.

U.S. exchange-traded futures positions by money managers

Note: Since the spring of 2013, the underlying commodity for the distillate futures contract has been ultra-low sulfur diesel (ULSD).
