

Propane Update

January 11, 2017 / Washington, DC

(Inventory data as of 01/06/17; residential heating fuel prices as of 01/09/17)

By

U.S. Energy Information Administration

PADD 2 (Midwest) propane inventories close to the 5-year average

PADD 2 propane* inventories

million barrels

Source: EIA, Weekly Petroleum Status Report, data through January 06, 2017

*propane/propylene for fuel use only

PADD 2 (Midwest) propane inventories just above the 5-year average

PADD 2 propane* inventories, difference from 5-year average

million barrels

Source: EIA, Weekly Petroleum Status Report, data through January 06, 2017

*propane/propylene for fuel use only

Selected state propane* inventories

Kansas propane stocks
thousand bbls

Michigan propane stocks
thousand bbls

Illinois, Indiana, Ohio propane stocks
thousand bbls

Iowa, Minnesota, Wisconsin propane stocks
thousand bbls

Source: EIA, Weekly Petroleum Status Report, data through January 06, 2017

*propane/propylene for fuel use only

PADD 3 (Gulf Coast) propane inventories within the 5-year range

PADD 3 propane inventories

million barrels

Source: EIA, Weekly Petroleum Status Report, data through January 06, 2017

*propane/propylene for fuel use only

PADD 3 (Gulf Coast) propane inventories above 5-year average

PADD 3 propane inventories, difference from 5-year average

million barrels

Source: EIA, Weekly Petroleum Status Report, data through January 06, 2017

*propane/propylene for fuel use only

Propane spot prices above prices at same time last winter

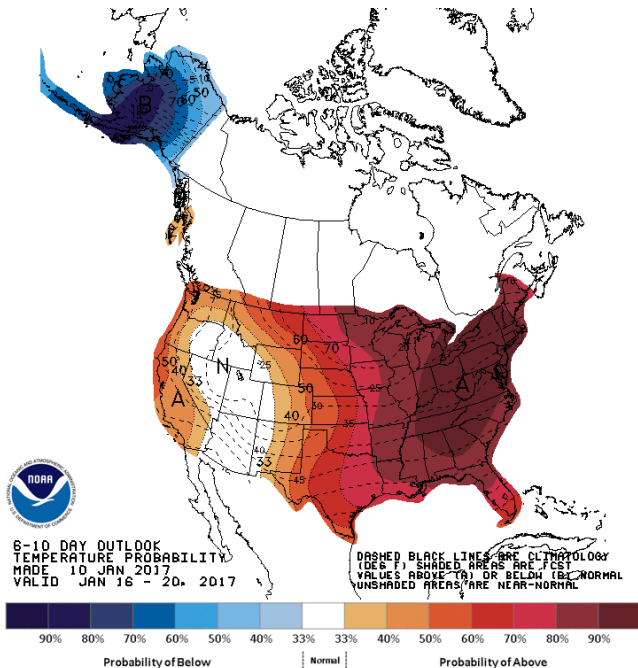

Propane spot prices (Conway, KS and Mont Belvieu, TX)

dollars per gallon

NOAA's projected temperatures: January 16– Jan. 20, 2017, and Jan. 18 – Jan. 24, 2017

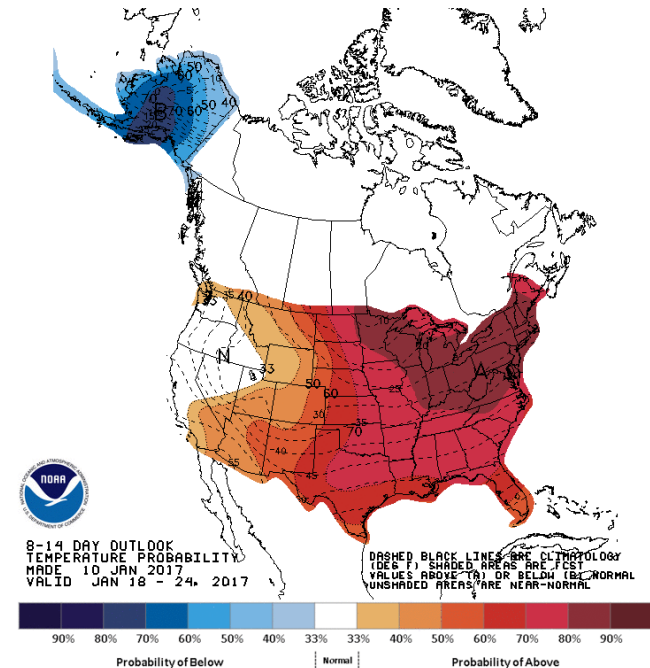

A = temperatures above normal

N = equal chance that
temperatures are above normal,
normal, or below normal

B = temperatures below normal

Source: NOAA, Jan. 10, 2017

Petroleum Administration for
Defense Districts (PADDs)

- NOAA forecasts above-normal or well-above-normal temperatures along the Pacific Coast and east of the Rockies, with normal temperatures in the Rockies region.
- Heating fuel consumption in PADDs 1, 2, 3, and 5 is likely to fall below normal for this time of year, with the Rockies region experiencing demand at levels corresponding with normal temperatures.

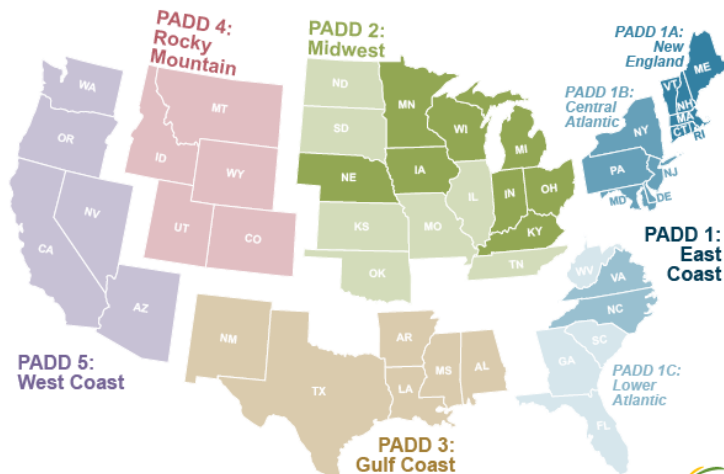

State Heating Oil and Propane Program (SHOPP) updates

- SHOPP is a collaborative program between states and EIA that provides weekly wholesale and retail prices for heating oil and propane at the state level
- EIA has extended SHOPP (beginning October 2014) to include 14 additional states in propane price data collection
- 10 new states were added to the wholesale propane price survey in 2016. This should be taken into consideration when comparing the average prices for last year (2015-2016 season) for the U.S., PADD 1, PADD 1B, PADD 1C, and PADD 2 averages
- EIA is providing more granular inventory data to states on a weekly basis during the 2016/2017 heating season
- New winter fuels page provides easier access to state-level information:
www.eia.gov/special/heatingfuels
