Notes: Finished motor gasoline production and product supplied includes a weekly adjustment applied only to the U.S. total to correct for the imbalance created by blending of fuel ethanol and motor gasoline blending components. From 1993 to June 4, 2010, this adjustment was estimated from the latest monthly data and allocated to formulation and PAD District production data. Reformulated and conventional gasoline production excludes adjustments for fuel ethanol and motor gasoline blending components. Historical data prior to June 4, 2010 includes the adjustment allocated by PAD District formulation. Propane/propylene includes production from natural gas plants. Imports and stocks of RBOB with Ether and RBOB with Alcohol are discontinued as of the week ending June 4, 2010 reporting period. Due to independent rounding, individual product detail may not add to total. Crude oil stocks include an adjustment of 10,630 thousand barrels (constant since 1983) to account for incomplete survey reporting of stocks held on producing leases. See Definitions, Sources, and Notes link above for more information on this table.

and notes link above for more information on this topic.
