

OKLAHOMA

2014 EIA reports and publications

OKLAHOMA ENERGY HIGHLIGHTS:

Oklahoma was 1 of 10 states in 2014 to set monthly crude oil and lease condensate production records since the previous peak in 1995.

Oklahoma ranked fifth in the nation in crude oil production in 2013, excluding federal offshore areas.

CRUDE OIL AND NATURAL GAS RESERVES

DECEMBER 4, 2014

U.S. Crude Oil and Natural Gas Proved Reserves, 2013

- In 2013, Oklahoma had the fourth-largest proved oil reserves at nearly 1.5 billion barrels.
- Oklahoma had the second-largest increase in lease condensate proved reserves at 104 million barrels.
- Oklahoma had the fourth-largest increase total discoveries of natural gas reserves at 4 trillion cubic feet (Tcf).

PETROLEUM AND OTHER LIQUIDS

AUGUST 7, 2014

Energy production and other mining account for a large percentage of some state economies

- Oklahoma ranked fifth nationally in crude oil production and fourth in natural gas production.
- Oklahoma experienced a 19% growth in mining activity from 2012 to 2013, up from its 10-year average of 7%.

RENEWABLES

APRIL 15, 2014

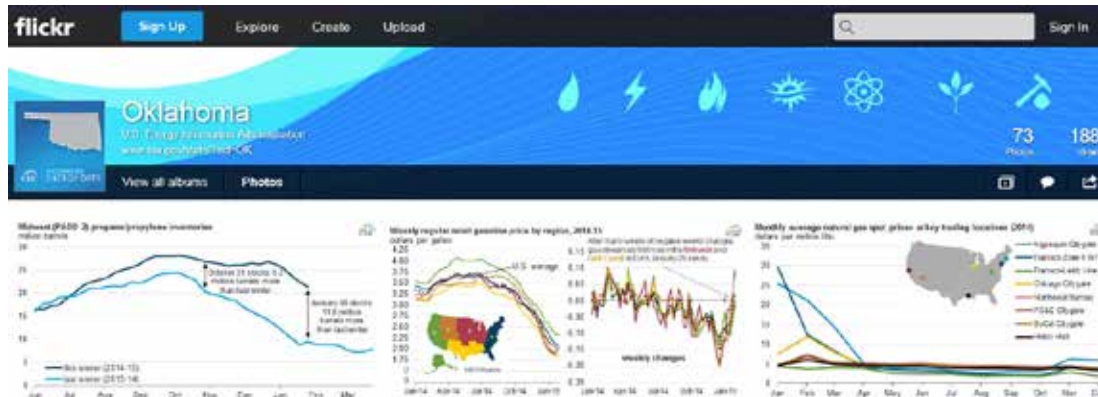

Twelve states produced 80% of U.S. wind power in 2013

- According to preliminary generation data released in EIA's [March 2014 Electric Power Monthly](#) report, Oklahoma was the country's fourth-largest producer of wind power with 10.88 million megawatthours (MWh) of electricity in 2013, accounting for more than 6.5% of the U.S. net generation from wind.

NEW TOOLS RELEASED IN 2014:

EIA's Oklahoma Flickr album

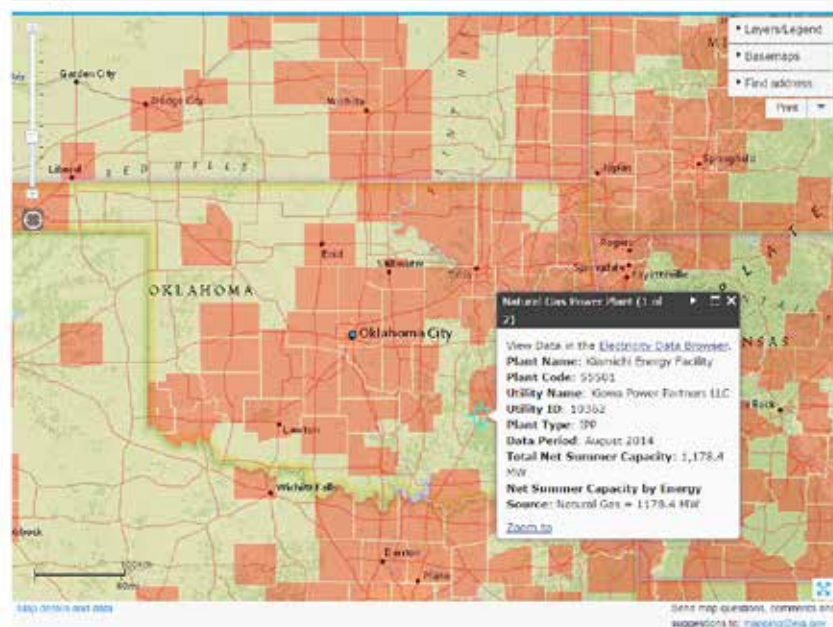

- The [Oklahoma album on EIA's Flickr page](#) provides users with access to images related to Oklahoma's energy production, consumption, prices, and other topics covered by EIA.

Flood Vulnerability Assessment Map

- EIA's [Flood Vulnerability Assessment Map](#) combines EIA's U.S. Energy Mapping System with flood hazard information from the Federal Emergency Management Agency (FEMA) to help state, county, city, and private sector planners determine if a specific area or energy asset is vulnerable to flooding caused by hurricanes, overflowing rivers, flash floods, and other wet-weather events.
