

Eastern Great Basin Oil & Gas Fields By 2004 Liquids Reserve Class

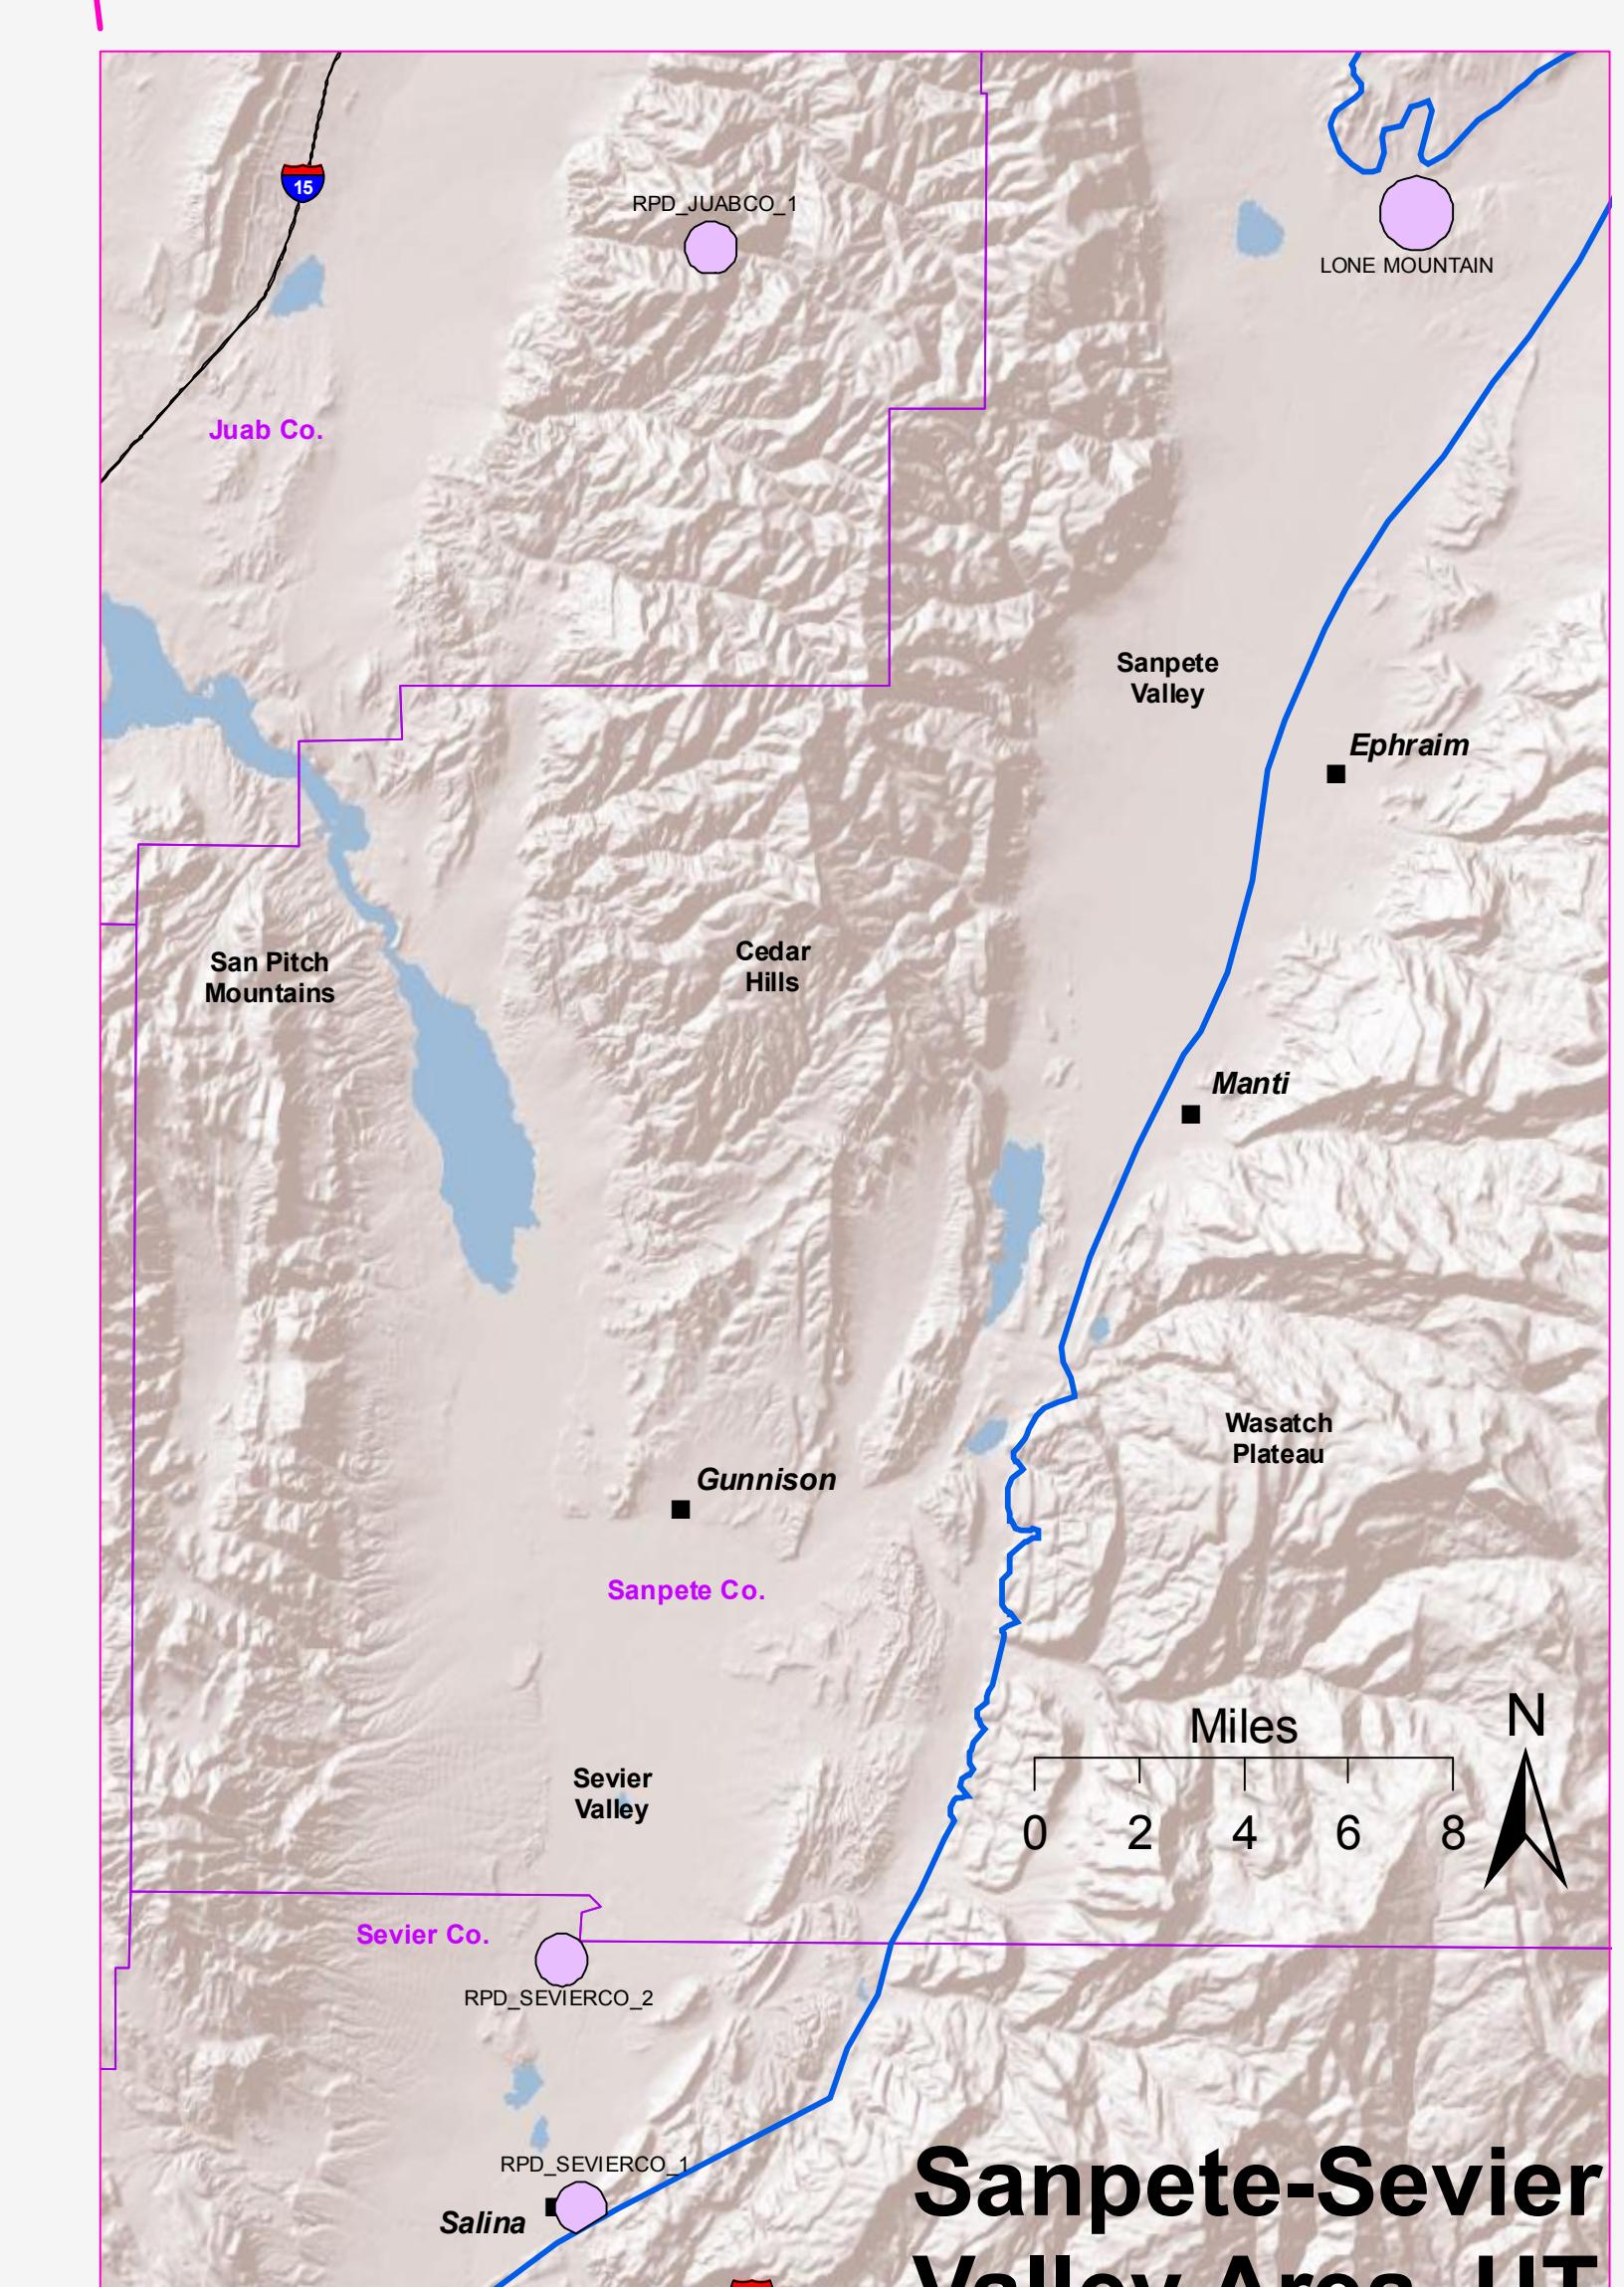

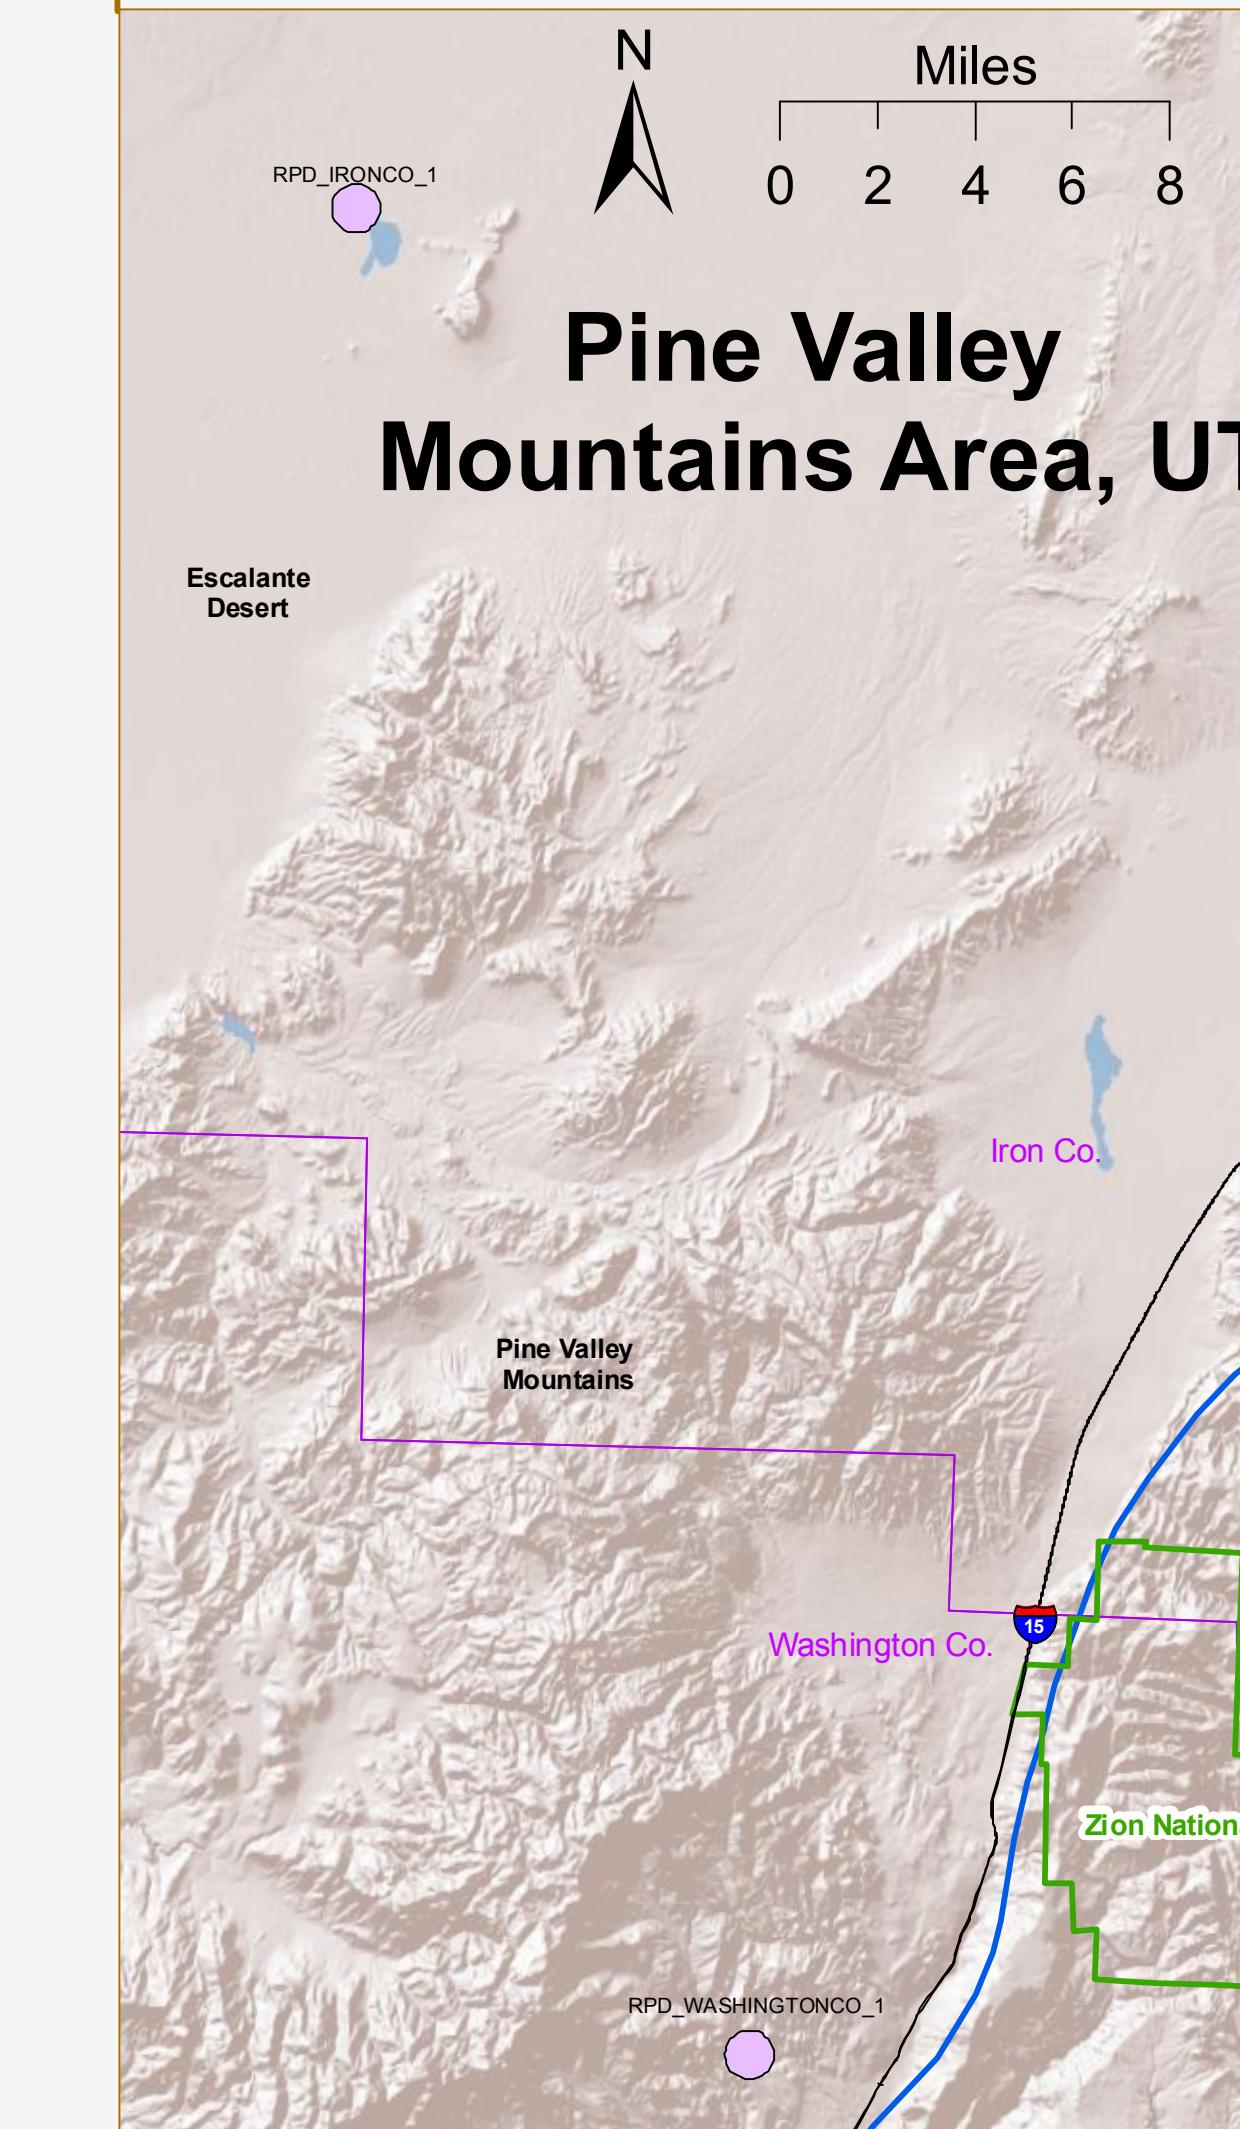

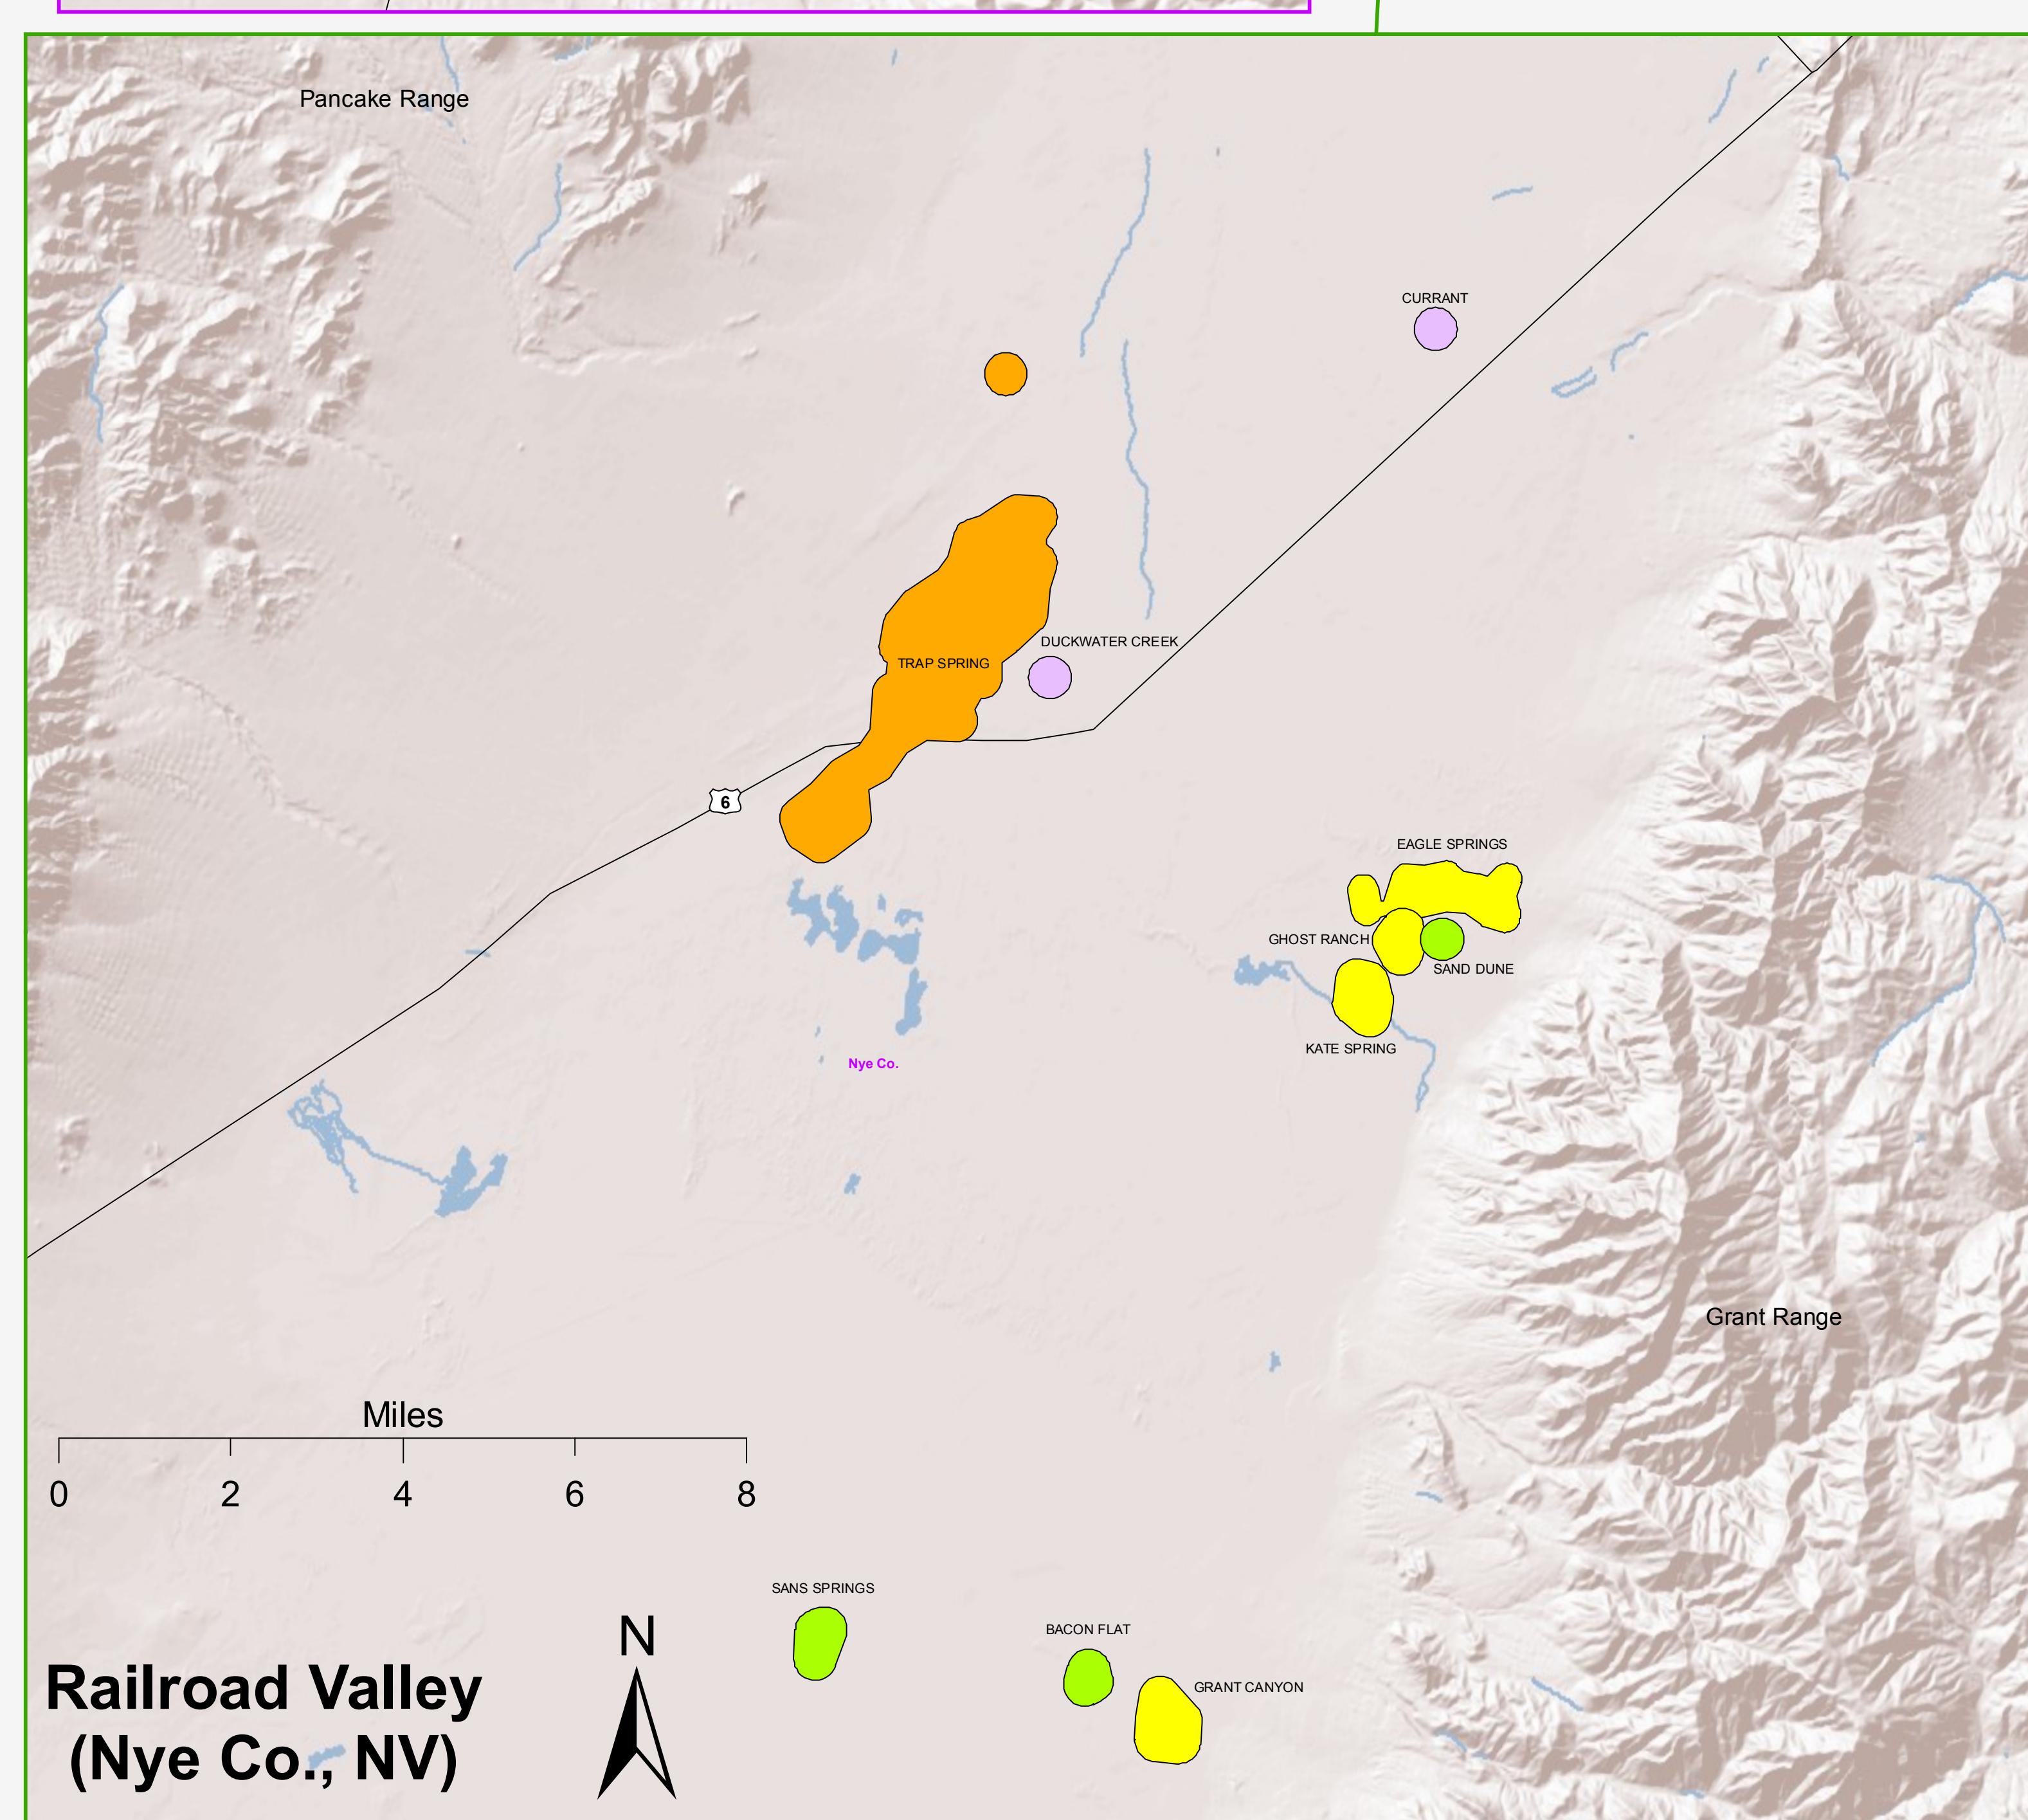

U.S. Energy Information Administration

Eastern Great Basin Oil and Gas Fields

2004 Liquids Reserve Class

- No 2004 Liquids Reserves
- 0.1 - 10 Mbbl
- 10.1 - 100 Mbbl
- 100.1 - 1,000 Mbbl
- 1,000.1 - 10,000 Mbbl
- > 10,000 Mbbl

The mapped oil and gas field boundary outlines were created by the U.S. Energy Information Administration pursuant to a requirement by Section 604 of the Energy Policy and Conservation Act Amendments of 2000 (P.L. 106-469). The boundaries are not informed by subsurface spatial information or data collected through the oil and gas industry, as detailed in the report "Scientific Inventory of Onshore Federal Land Oil and Gas Resources and Reserves and the Extent and Nature of Restrictions to Their Development", prepared by the US Departments of Interior, Agriculture and Energy.

Bottom-hole well locations were not available digitally for directional and horizontal wells, therefore the field boundaries for fields with many of those well types may be conservative.

Map created May 2008; projection is UTM-12, NAD-27.
