The mapped oil and gas field boundary outlines were created by the Reserves and Production Division, Office of Oil and Gas, Energy Information Administration, pursuant to studies required by Section 216 of the Energy Policy and Conservation Amendments of 2005 (P.L. 109-469). The boundaries are not informed by subsurface structural information. The data and methods used in their creation are detailed in a report, "Scientific Inventory of Offshore Federal Lands Oil and Gas Resources and Their Development Potential and Nature of Restrictions to Their Development", prepared by the US Departments of Interior, Agriculture and Energy.

Map created September 2005; projection is UTM-16, NAD-27.
