

Paradox-San Juan Basin Northwestern Portion (Panel 1 of 2) Oil & Gas Fields by 2001 BOE Reserve Class

| 2001 BOE Reserve Class | |
|-------------------------|--|
| No 2001 reserves | |
| 0.1 - 10 MBOE | |
| 10.1 - 100 MBOE | |
| 100.1 - 1,000 MBOE | |
| 1,000.1 - 10,000 MBOE | |
| 10,000.1 - 100,000 MBOE | |
| > 100,000 MBOE | |
| Basin Outline | |

The mapped oil and gas field boundary outlines were plotted by the Reserves and Production Division, Office of Oil and Gas, Energy Information Administration pursuant to studies required by Section 604 of the Energy Policy and Conservation Act Amendments of 2000 (P.L. 106-487). These outlines are not informed by subsurface static information. The date and method used to determine location are detailed in a report, "Scientific Inventory of Onshore Federal Lands' Oil and Gas Resources and Reserves and the Extent and Nature of Their Development," prepared by the US Departments of Interior, Agriculture and Energy.

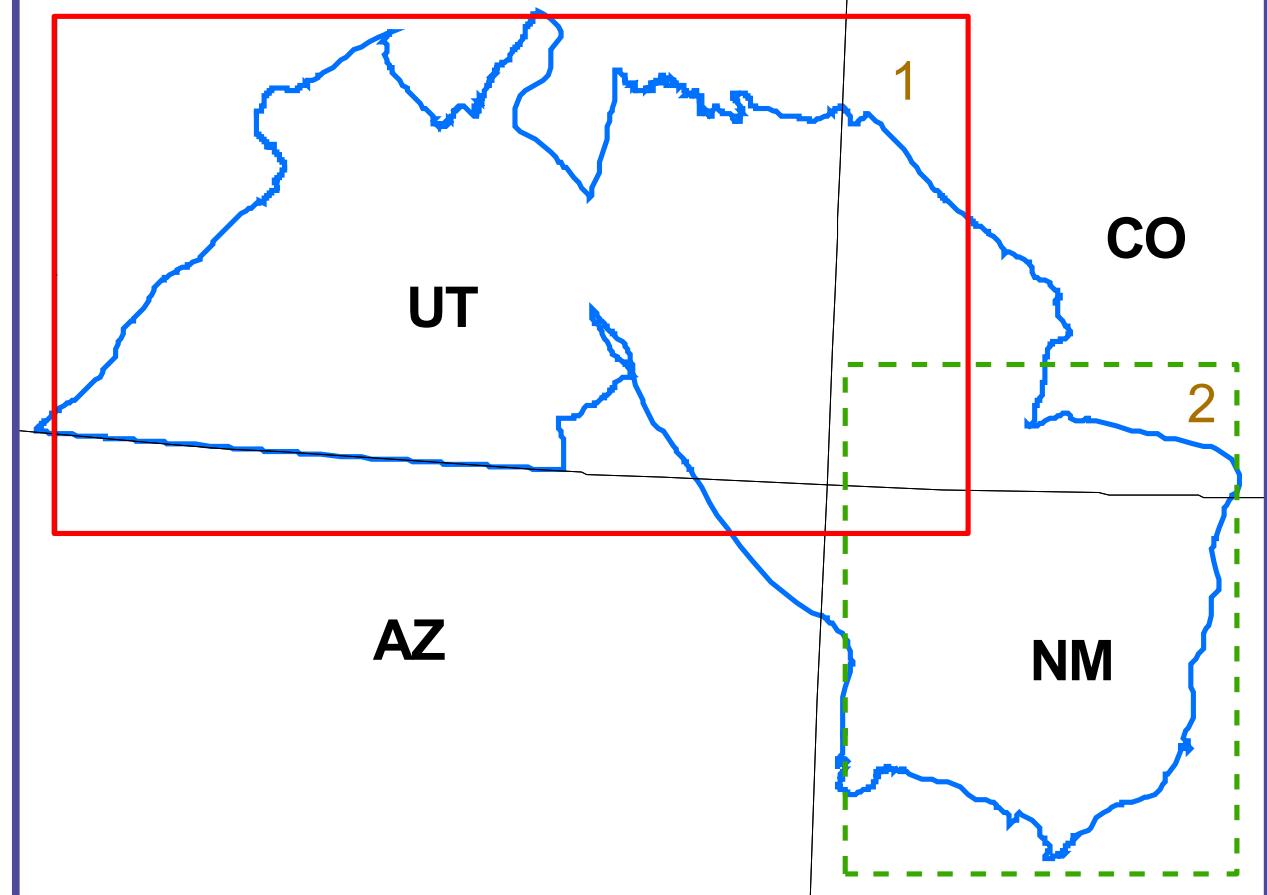

Unnamed fields and fields generically named "wildcat" were renamed to a concordance of their basin and state of occurrence, e.g. UP-UT (Utah-Pronge Basin and Utah).

Map created June 2005; projection is UTM-13, NAD-27.
