<sup>These numbers could include a combination of Desktop and Laptop personal computers.

NE = RSE row factor not estimated because RSE's for all statistics in this row are between 0.0 and 1.0 percent.

Q = Data withheld either because the Relative Standard Error (RSE) was greater than 50 percent or fewer than 10 households were sampled.

Notes: • To obtain the RSE percentage for any table cell, multiply the corresponding column and row factors.

• Because of rounding, data may not sum to totals.</sup> 

<sup>•</sup> See "Glossary" for definition of terms used in this report.
