Computer Control of Processes or Major Energy-

<sup>(</sup>a) The Bureau of the Census classifies establishments using the North American Industry Classification System (NAICS).

(b) The Establishments column includes those units which reported any of the five listed energy-saving technologies in use anytime in 2010, plus those units where usage of those energy-saving technologies was not reported or ascertained.

(c) Some examples are space-heating equipment, cooling equipment, and lights.

(d) Some examples are positing the same conveyors used in the manufacturing process.

Released: July 2013
Next MECS will be feedbed in 2015

Computer Control of Processes or Major Energy-

- (e) This count includes only those establishments that reported this technology in use anytime in 2010.

  (f) This includes establishments that have the equipment but are currently not in use as well as those establishments that do not have or never have had the equipment during 2010.

  NF=No applicable RSE rowicolumn factor.

  \*\*Estimate less than 0.5.

  W=Withheld to avoid disclosing data for individual establishments.

  Q=Withheld because Relative Standard Error is greater than 50 percent.

  NA=Not available.

<sup>(</sup>a) The Bureau of the Census classifies establishments using the North American Industry Classification System (NAICS).
(b) The Establishments' column includes those units which reported any of the five listed energy-saving letchnologies in use anytime in 2010, plus those units where usage of those energy-saving letchnologies was not reported or ascertained.
(c) Some examples are space-heating equipment, cooling equipment, and lights.
(d) Some examples are boliers, furnaces, and conveyors used in the manufacturing process.
(e) This count includes only those establishments that reported this technology in use anytime in 2010.

Released. July 2013
Next MECS will be fielded in 2015
