Notes: • Data are received as final. • Projected data are updated annually. • NERC Regional Council names may be found in the reference document.

- Notes: Data are received as final. Projected data are updated annually. NERC Regional Council names may be found in the reference document.
   Information identified for reliability purposes by NERC.
   Line Type: OH-Overhead; UG=Underground; SM=Submarine.
   Voltage Type: AG=Alternating Current; DC=Direct Current.
   Conductor Material Type: AL=Alterninum; ACCR=Alterninum Composite Conductor Reinforced; ACSR=Aluminum Core Stee Reinforced; CU=Copper; OT=Other.
   Bundling Arrangement: 1=Single; 2=Double; 3=Triple;4=Quadruple; OT=Other.
- Pole Material: W=Wood; C=Concrete; S=Steel; B=Combination: P=Composite:O=Other.
- Pole Type: P=Single pole; H=H-frame; T=tower; U=Underground; O=Other.
- Country: Canada (C), Mexico (M), United States (U) and total (T) for all countries within a single region.
   Regional name has changed from Mid-Continent Area Power Pool (MAPP) to Midwest Reliability Organization (MRO).
- Company names and reference abbreviations are from the NERC usage. This also holds for the ownership codes and linkage to EIA company codes.
- Data are received as final from the NERC on this voluntary form. Canadian and Mexican data are supplied by the NERC for this data schedule.

Totals may not equal sum of components because of independent rounding.
